ABOUT ME

Hi ! I'm Bertrand, a 25 years old guy from Liege curious about the world who likes to learn and help others. I started programming because I felt it could be a game-changer in the educational system, but it is still not well-used. My main focuses are a **greener, more accessible, open source, privacy-oriented web and better ways to learn**. On the side, I've been a scoutmaster since 2013.

I have interests in a lot of stuff, such as are environment, nature, scouts, science and mathematics, game design,... and am always open to discover something new.

If you're interested in my profile, don't hesitate to contact me !
